

General Machinist (429A) – Full Time

Wyrks Tool & Machine has an immediate opportunity for a **Full Time General Machinist to operate CNC Machinery**. Must possess strong general machining skills to program, set up and operate CNC mills independently.

PAY RATE:

\$28.00 to \$33.00 dependant on experience and capabilities

BENEFITS:

- Day Shift, Monday to Friday.
- Opportunity for overtime.
- Modified summer hours from May – October (1/2 days Fridays).
- Scheduled shutdown every year – August summer shutdown and December holiday shutdown.
- 3 weeks vacation.
- Employee and family benefits: life insurance, standard drug and health care, basic dental, additional health care spending account, EAP plan and long term disability.
- All covid protocols in place: daily screening, sanitizing, mask protocol and social distancing.
- Large floor space, excellent ventilation, physical barriers and numerous employee areas to support COVID safety.

THIS POSITION REQUIRES A CANDIDATE TO:

- Possess a General Machinist (429A) certification and have completed a 4 year apprenticeship program in a machine shop.
- Have 5+ years experience in a custom machining environment.
- Possess the skill to independently set up work and to select proper material and tooling for the job.
- Accurately read and interpret blueprints as well as measure/inspect final machined parts.
- Have a willingness to work with minimal supervision and to co operate accordingly with co workers and management.
- Possess a working knowledge of Fanuc and Fagor controllers.
- Maintain a clean and organized work area, a positive work atmosphere and follow all safe work practices.
- Capable of bending, twisting, reaching freely and standing for long periods of time and be capable of lifting up to 50 lbs.
- Provide basic personal machinist tools such as vernier, scales, hammer, etc.

THE JOB DUTIES MAY INCLUDE:

- Reading and interpreting engineering drawings, blueprints, charts and tables.
- Collaborating with co-workers and management on set up and operation.
- Measuring, examining, and testing of completed units to detect defects and ensure conformance to specifications.
- Meeting Daily production targets and schedules.
- Tagging and recording finished parts for shipment.
- Maintaining accurate records and completing all required paperwork such as, Inspection Reports, Job Time Sheet, Daily Time Sheet.
- Verifying dimensions of machined tools and parts.

The ideal candidate is well organized, detail oriented, with good manual dexterity, solid mathematical skills and a strong work ethic. Excellent problem-solving skills and excellent communication and organizational skills are essential. Demonstrated ability to attend work on a regular basis is required.

This position is well suited for a tradesperson who is self motivated and enjoys a variety in their workday. It offers the opportunity to work in a busy, diverse, team-oriented environment with daily peer and management support and interaction.
